WORKPLACE INJURIES

Using sensors and artificial intelligence, KINETIC's wearable device detects unsafe motions and postures, and provides workers with real-time feedback. This lowers injuries, fatigue and absenteeism.

PROXIMITY ALERTS

Our wearable technology provides real-time notifications to workers whenever they come close to each other, helping to create awareness on proper social distancing practices.

CONTACT TRACING

Our software analytics platform automates precise and reliable contact tracing should a worker become sick. Create reports listing all contacts and their duration, enabling management to make the best workplace decisions to reduce the spread of COVID-19.
