Contact Tracing and Social Distancing Reminders Solution

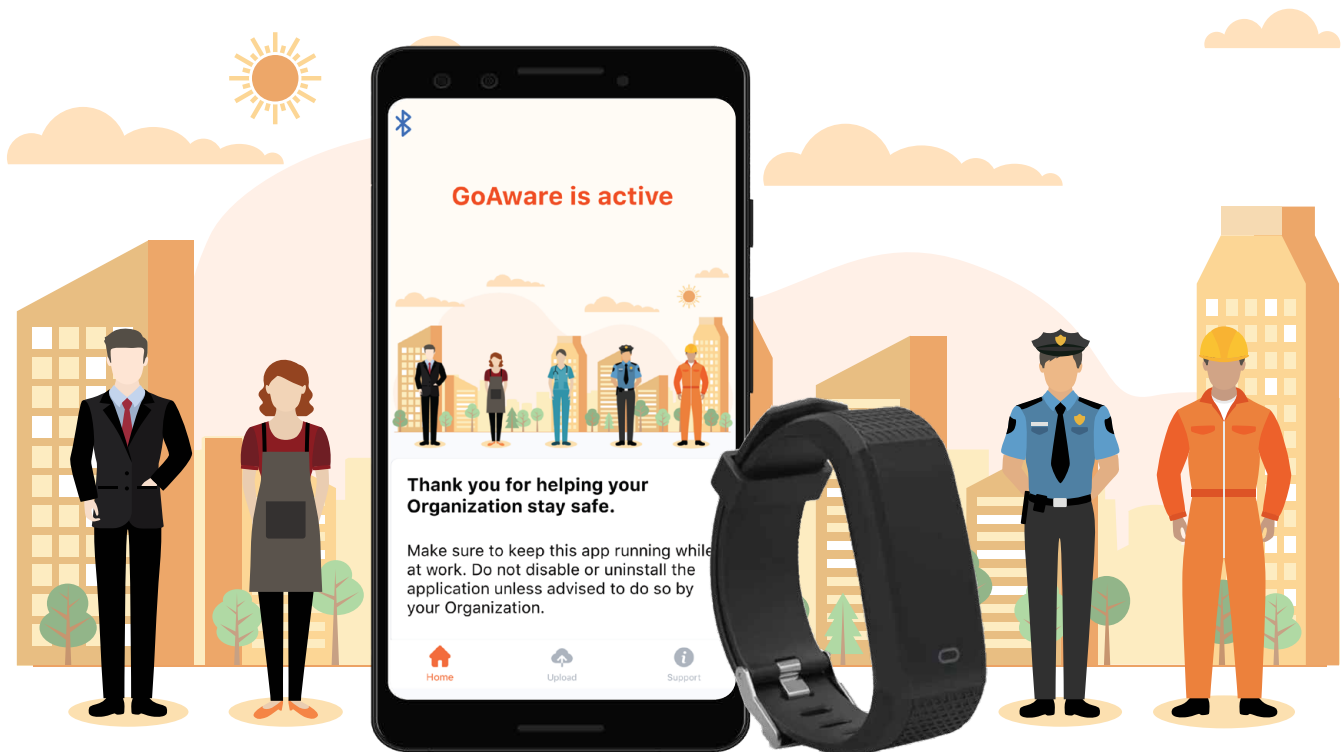

Aware360: GoAware & GoBand Solutions

Prevent spread and enhance contact tracing with app and wearable technology.

Workplaces are at a high risk for the spread of viruses like COVID-19, especially where workers are in close proximity. Business leaders have a responsibility to ensure a safe workplace for both the health of their workers and for their ongoing business continuity.

The GoAware Solution provides organizations the tools to manage a safe return to work. With an easy-to-use smartphone app for Android and Apple phones, the solution helps assist organizations with contact tracing in case of a positive COVID-19 test.

The GoBand Wearable Solution enables organizations to not only perform quick and accurate contact tracing, but also provides real time social distancing reminders to workers wearing GoBands.

AWARE 360

Aware360: GoAware and GoBand Solutions

Prevent spread and enhance contact tracing with app and wearable technology.

How the Solutions Work

Organizations choose to deploy either the GoAware App or GoBand contact tracing wearables. Apps can be onboarded through an MDM or through app stores. GoBands are assigned to users by managers.

If an individual tests positive for COVID-19 they must contact their Program Administrator.

The Program Administrator communicates with the infected worker to facilitate the upload of trace data from the App or GoBand device. Then, they upload the data into an analysis template.

The Program Administrator follows the organization's COVID-19 positive test policy using contact trace data to assist their efforts.

Key Benefits

- ✓ Prevent the spread with real time social distancing reminders (GoBand only)
- ✓ Keep workers safe with rapid access to contact tracing data
- ✓ Ensure business continuity by avoiding worksite shutdowns
- ✓ Prove your business is compliant with legislation
- ✓ Demonstrate prioritization of worker safety to unions
