Online Medical Evaluations
Reliable • Quick • Simple

1 Get Cleared Online

The first step in complying with OSHA's Respiratory Protection Standard (29 CFR 1910.134) is to get medically cleared by a Physician or other Licensed Healthcare Professional to wear a respirator. We make it easy at www.RespiratorAssessor.com!

2 Get Trained

Once you have submitted your medical clearance questionnaire at www.RespiratorAssessor.com, complete a brief training tutorial online. It's free!

3 Get Fit Tested

Getting fit tested for the respirator you need to wear is a simple process. A professional specifically trained to administer fit testing using scientifically proven means of measuring respirator face-seal leakage will provide a rigorous test of the respirator fit. Contact us to arrange a fit test at any of our convenient training & compliance centers. If there isn't one near you, we'll come to you or help you find an qualified provider!

Contact your Grainger Rep for Details, Availability, and Eligibility.
