

### Lockout/Tagout

**Instructions:** This checklist is intended to help you identify potential hazards in your workplace. The questions are based on applicable Federal OSHA standards. Keep in mind that additional state and local regulations may apply, depending upon your location. Please check one answer for each question. If you select “no,” you should investigate further to determine what corrective action may be needed to address the hazard. You can review the specific OSHA Standards outlined below at [www.osha.gov/law-regs.html](http://www.osha.gov/law-regs.html). Choose “General Industry” or “Construction.”

|    | Questions  | OSHA Regulation       | Yes                      | No                       | N/A                      |
|----|--|-----------------------|--------------------------|--------------------------|--------------------------|
|    | <b>General Requirements for Energy Control</b>   |                       |                          |                          |                          |
| 1) | Are all energy isolating devices for machines or equipment designed to accept a lockout device?  | 1910.147(c)(2)(iii)   | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 2) | Are lockout and/or tagout devices being affixed to each energy isolating device by authorized employees?   | 1910.147(d)(4)(i)     | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 3) | Do procedures exist and is someone assigned responsibility for removing and transferring locks and tags?   | 1910.147(c)(4)(ii)(C) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 4) | Do procedures exist for shutting down, isolating, blocking, and securing (locks and tags) energy?  | 1910.147(c)(4)(ii)(B) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 5) | Do requirements exist for testing a machine or equipment to determine and verify the effectiveness of lockout/tagout and other energy control measures?  | 1910.147(c)(4)(ii)(D) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 6) | Do the procedures clearly outline the scope, purpose, responsibility, authorization, rules, and techniques to be utilized for the control of hazardous energy, and means to enforce compliance?  | 1910.147(c)(4)(ii)    | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 7) | Does the employer have procedures for control of hazardous energy with specific requirements for securing machines, placement, transfer, and removal of lockout devices, and testing locked machinery?                                       | 1910.147(c)(4)        | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 8) | Does the program require that all hazardous energy sources be isolated, locked or tagged, and otherwise disabled before anyone performs any activity where the unexpected energization, startup, stored energy could occur and cause injury? | 1910.147(c)(1)        | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

# Lockout/Tagout

|            | Questions   | OSHA Regulation          | Yes                      | No                       | N/A                      |
|------------|---|--------------------------|--------------------------|--------------------------|--------------------------|
|            | <b>General Requirements for Energy Control</b>  |                          |                          |                          |                          |
| <b>9)</b>  | If an energy-isolating device cannot be locked out, is a tagout procedure used?   | 1910.147(c)(2)(i)        | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>10)</b> | Prior to starting work on machines that have been locked out or tagged out, does the authorized employee verify that isolation of the equipment has been done?  | 1910.147(c)(9)           | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>11)</b> | When a tagout device is used on any energy isolating device is it capable of being locked out?  | 1910.147(c)(3)(i)        | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
|            | <b>Protective Materials and Hardware</b>  |                          |                          |                          |                          |
| <b>12)</b> | Are lockout and tagout devices capable of withstanding the environment to which they are exposed?   | 1910.147(c)(5)(ii)(A)(1) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>13)</b> | Are lockout and tagout devices standardized within the facility (i.e., color, shape, size, and format)?   | 1910.147(c)(5)(ii)(B)    | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>14)</b> | Are lockout devices strong enough to prevent removal without the use of excessive force?  | 1910.147(c)(5)(ii)(C)(1) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>15)</b> | Are locks, tags, chains, adapter pins, or other hardware available for securing or blocking energy sources?   | 1910.147(c)(5)(i)        | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>16)</b> | Are tagout devices strong enough to prevent accidental removal?   | 1910.147(c)(5)(ii)(C)(2) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>17)</b> | Do tagout devices warn against hazardous conditions if the machine or equipment is energized and include a legend such as "Do not start" or "Do not operate?"   | 1910.147(c)(5)(iii)      | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
|            | <b>Periodic Inspections</b>   |                          |                          |                          |                          |
| <b>18)</b> | Are inspections conducted by an authorized person (other than the ones using the energy control procedures) to ensure control procedures are being implemented? | 1910.147(c)(6)(i)(A)     | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

# Lockout/Tagout

|            | Questions  | OSHA Regulation      | Yes                      | No                       | N/A                      |
|------------|--|----------------------|--------------------------|--------------------------|--------------------------|
|            | <b>Periodic Inspections</b>  |                      |                          |                          |                          |
| <b>19)</b> | Does the employer conduct a periodic inspection of the energy control procedure at least annually to ensure that procedures are being followed?  | 1910.147(c)(6)(i)    | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>20)</b> | Is each inspection certified by identifying the machine or equipment on which the energy control procedure was being used, the date of the inspection, the people included in the inspection, and the person performing the inspection?          | 1910.147(c)(6)(ii)   | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
|            | <b>Training</b>  |                      |                          |                          |                          |
| <b>21)</b> | Does the training program include all other employees whose work operations may be in an area where energy control procedures may be utilized?   | 1910.147(c)(7)(i)(C) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>22)</b> | Does the training program include each authorized employee in the recognition of hazardous energy sources?   | 1910.147(c)(7)(i)(A) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>23)</b> | Is this training repeated periodically when changes or deviations occur in the energy control procedure?   | 1910.147(c)(7)(iii)  | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>24)</b> | Is training provided and documented to ensure that (a) the purpose and function of the energy control procedures are understood, and (b) the knowledge and skills required for the safe application and removal of energy controls are acquired? | 1910.147(c)(7)(i)    | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>25)</b> | When tagout systems are used, are employees trained in the limitations of the tags?  | 1910.147(c)(7)(ii)   | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

**Safety Checklist Disclaimer:** This safety checklist (the "Material") is made available to the user or other receiver of the Material for general informational purposes only. The Material has been developed with consideration of various factors relevant to the subject area, including federal laws and regulations in effect at the time the Information was created and/or certain good management practices relevant to the subject area. Because every industry and/or workplace presents unique circumstances, the Material does not constitute and is not intended to provide specific advice, assurances, or guarantees concerning any user's compliance with particular regulatory requirements (e.g., OSHA) or other applicable safety and/or health requirements or good management practices. The Material does not constitute training and does not replace the need to properly train all employees nor is the Material a substitute for an assessment of any safety or health hazards present at your facility by a health or safety professional or expert. Users are advised to consult with a legal or other professional advisor concerning specific regulatory compliance requirements applicable to their workplaces and appropriate use of the Material. Users and receivers of the Material are subject in all respects to the terms and conditions set forth [www.grainger.com](http://www.grainger.com), including those provisions relating to limitation of liability. Users and receivers of the Material assume all responsibility and risk arising from any and all use of and/or reliance upon the Material, including any modifications made thereto. W.W. Grainger, Inc. makes no warranty, express or implied, that the Material is current, accurate, appropriate or complete for any particular facility or requirements applicable to a particular facility.
