power transmission

FEIN QuickIN rapid clamping system.

With QuickIN, the patented, tool-free FEIN rapid clamping system – when combined with Starlock, it safely and conveniently delivers the fastest tool change in less than 3 seconds.

Simply position accessory in the Starlock mounting and click into place.

To release, open clamping lever ...

... and eject accessory. Job done!

The Starlock tool mountings.

3D form ensures the perfect fit for accessories. For 100% power transmission without losses together with enhanced precision.

STARLOCK

Universal accessory tool mounting for the most popular multifunction tools on the market.

STARLOCK PLUS

For all FEIN oscillating multi-tools and other multifunction tools with StarlockPlus tool mounting.

STARLOCK MAX

For FEIN SUPERCUT and all other oscillating multi-tools with StarlockMax tool mounting.

* Noise can make workers ill. The FEIN anti-vibration system has almost halved the sound pressure level of FEIN oscillating multi-tools (measured with the multi-tool switched on and running at maximum speed, without tools). This impresses not just users undertaking non-stop sanding work or extensive renovations, but also anyone working nearby.

** Depending on application and the accessory used, vibrations only reach vibration class 1 in most cases. Users can therefore work for around 8 times longer (compared with FMT 250 and many competitor products), before reaching the daily vibration limit permitted in Germany and most of the EU.

**Purchase a FEIN model.
and get your free accessories.**

Das Original
Since 1967

We don't consider tools and accessories as stand-alone elements. One cannot achieve its full potential without the other. So we developed a system that ideally combines their strengths. On the one hand, this system comprises our powerful oscillating multi-tools and on the other, the most extensive range of accessories on the market,

opening up an incredibly wide range of use. Together, they provide outstanding precision, maximum comfort, the best performance and a perfect result. In a nutshell: this system always provides exactly the right solution for thousands of professional jobs.

The benefits of FEIN tools

Developed and manufactured for maximum performance and extreme load handling in professional use in trades and industry. Largest product range on the market available as powerful mains-powered and battery-operated versions. Distinct competitive edge from numerous patented product features, such as the anti-vibration system.

The benefits of the FEIN genuine accessories

Largest range of accessories on the market in all 3 Starlock performance classes, the new standard for oscillating power tools. Superlative FEIN quality for outstanding service life, maximum work progress and perfect results. Numerous exclusive FEIN accessories for unique solutions.
