Fatigue and Impairment Assessment Solution

Aware360: Aware4Duty

Screen workers for fatigue and impairment in under 60 seconds.

According to the National Safety Council, 69% of employees are tired at work. Fatigue can affect performance, and in high-risk activities mistakes can be fatal. It only takes a minute to gain peace-of-mind that your team has arrived at the job site fit for duty. The Aware4Duty app is a simple cognitive test that assesses alertness. It improves safety and efficiency by identifying risks before they become incidents.

- ✓ App-based technology focused on cognitive acuity
- ✓ Detects impairment from fatigue, illicit drugs, prescription medication, alcohol and stress
- ✓ Provides objective data to the worker and organization, to elevate safety and productivity
- ✓ Validated by National Institute of Occupational Safety and Health (NIOSH)

Aware360: Aware4Duty

Screen workers for fatigue and impairment in under 60 seconds.

Many factors can impact our mental acuity, but historically, testing has focused solely on drug and alcohol impairment. This narrow focus excludes numerous other factors that can inhibit mental fitness such as fatigue, stress, distraction, prescription drugs and over-the-counter medications. Traditional testing requires physical samples and is time consuming, leaving a potentially impaired worker onsite. Aware4Duty produces results in under one minute.

Key Benefits

- ✓ Identify workers with impaired alertness before safety-related incidents occur
- ✓ Improve workplace efficiencies through accountability and data insights
- ✓ Prove Duty of Care and comply with workplace fatigue and impairment regulations
- ✓ Reduce worker's compensation claims by up to 70% and drug testing costs by 90%.

How it works

- 1) The Aware4Duty App is downloaded on worker phones or tablets.
- 2) Workers establish their individual baseline score by taking the assessment 10 times.
- 3) Before, during and/or after shifts workers take the 60 second assessment.
- 4) If workers score outside their normal range, they and their supervisor are notified.

App-Based Driver Behavior Monitoring Solution

Aware360: iDriveAware

Improve driver safety with insights you can act on.

iDriveAware is for employers and managers who need to ensure their workers are safety while driving. This mobile technology monitors driver behaviors via the iDriveAware App and creates useful data for managers to analyze and assess, devliered through the iDriveAware cloud-based portal.

iDriveAware leverages real time contextual data and driver event logging to create fair scores for all. In addition, managers can use the iDriveAware portal to see driver ranks, specific behavior concerns, data trends and analytics, and individualized driver coaching reports.

AWARE³⁶⁰

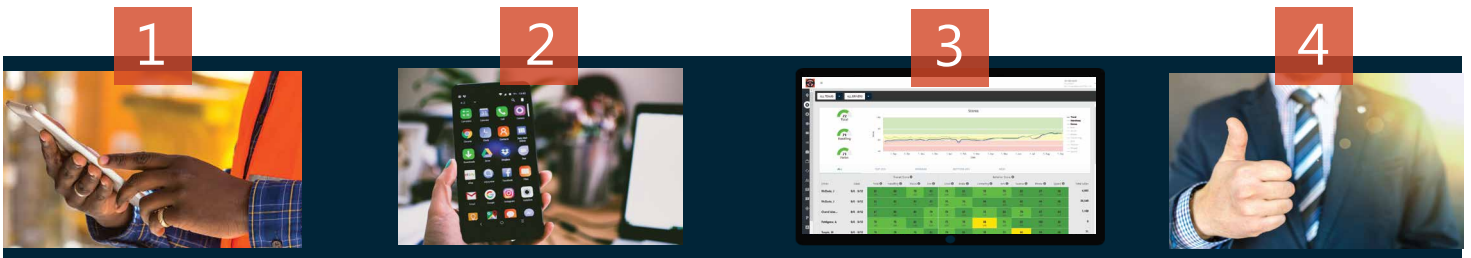

Aware360: iDriveAware

Improve driver safety with insights you can act on.

AVAILABLE ON
iOS & ANDROID

How iDriveAware Works

1

App Installed
Workers download the iDriveAware App or the Administrator pushes it through their organization's MDM.

2

Runs Quietly in the Background
iDriveAware App runs quietly in the background of the phone and collects driving data, using only 3% battery / day.

3

Insights and Reports
Users can view their scores, trips, and weekly coaching reports and improve upon bad behaviors (speeding, distracted driving, swerving, etc.).

4

Provides Individualized Feedback
Individuals and their Supervisor receive detailed insight to help improve their overall driving behavior.

iDriveAware Key Benefits

- ✓ Protect and save lives with tailored feedback provided to drivers in coaching reports
- ✓ Collects driver insight for: speeding, phone use, acceleration, braking and cornering
- ✓ Minimize phone distractions and allow drivers to focus on the task at hand
- ✓ Gather business insights with robust reporting in the iDriveAware Portal
- ✓ Prove compliance with distracted driving legislation
- ✓ Reduce corporate risk and fulfill Duty of Care obligations

Distracted Driving Prevention Solution

Aware360: LifeSaver Mobile

Minimize phone-related distractions while workers are driving with LifeSaver

According to the National Safety Council, driving is the most dangerous activity workers perform, causing **40%** of workplace fatalities. LifeSaver changes the culture of distracted driving by automatically detecting drives and blocking cell phone use without additional hardware. LifeSaver is an easy to deploy, software-based solution which minimizes phone-based distractions for employees while driving.

Adding LifeSaver to your fleet has been shown to reduce at-fault collisions by **25-50%**. The solution ensures compliance with distracted driving legislation and provides managers with a simple tool to ensure their policies are followed. Taking a proactive approach to safety, LifeSaver reduces corporate risk by minimizing WCB claims and ensuring Duty of Care.

Aware360: LifeSaver Mobile

Minimize phone-related distractions while workers are driving with LifeSaver

How LifeSaver Works

1

2

3

Download the App

Identify employees who drive for work purposes and have them download the App or push it out through an MDM.

Automatic Blocking

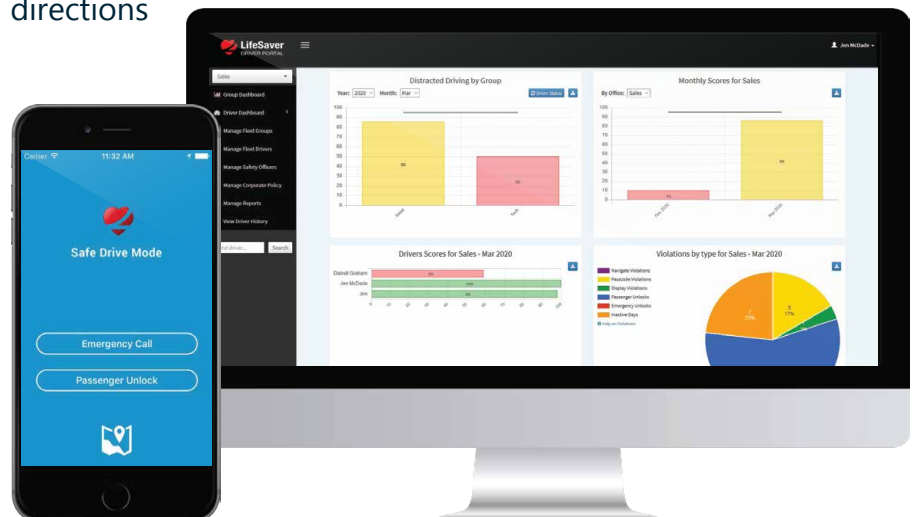

While workers drive, the app will automatically block their phone screen. Configure apps to allow and ability to unlock in the portal.

Insights and Feedback

Managers and supervisors gather insights from the LifeSaver Portal to tailor feedback (good and bad) to specific workers.

Key Solution Benefits

- ✓ App-based, no hardware installation means no downtime for your fleet
- ✓ Promotes self-correction and real time visual intervention
- ✓ Provides a substantial return on investment (ROI)
- ✓ Proven to reduce at-fault collisions by 25-50%
- ✓ Allows for hands-free calls and map directions
- ✓ Cost effective and quick to deploy
- ✓ Automatically detects driving

At-Risk and Lone Worker Safety Solution

Aware360: SafetyAware

Improve safety, enhance productivity and reduce risk for lone and at-risk workers

One in five workers in North America is considered a lone worker. Employees in a wide variety of fields — including social services, energy, and construction — are required to work alone or in dangerous environments, putting them at a high risk for injury, illness, and fatality.

SafetyAware provides instant communication and robust response that supports lone workers whenever, wherever they are. At the same time, SafetyAware keeps teams productive by automating manual processes, letting supervisors broadcast messages and providing data that can help improve business processes. SafetyAware meets legal obligations for duty of care while going beyond the basics – to save lives as well as improve your bottom line.

Aware360: SafetyAware

Improve safety, enhance productivity and reduce risk for lone and at-risk workers

How SafetyAware Works

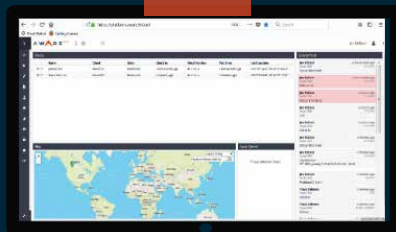

1

Workers with Edge Devices:

Connect workers with the SafetyAware App, wearables, satellite devices and more to send check-ins and alerts.

2

Control Center:

Real time data is analyzed in the cloud-based Control Center platform. Exception-based alerts are prioritized for action.

3

Real Time Response Center:

24/7 live monitoring of alerts and status indicators. Monitors action alerts in real time based on your configurable escalation plan.

Key Solution Benefits

- ✓ Send rapid SOS alerts for emergencies and receive help from trained professionals
- ✓ Leverage a variety of devices to suite your worker's unique environments
- ✓ Proactively check-in with monitors to ensure worker safety
- ✓ Reduce corporate liability and perform audits on critical event history
- ✓ Enhance safety with man-down and no motion alerts
- ✓ Automate manual processes and gain insightful data
- ✓ Comply with regulations and prove Duty of Care
