# Contact Tracing and Social Distancing Reminders Solution

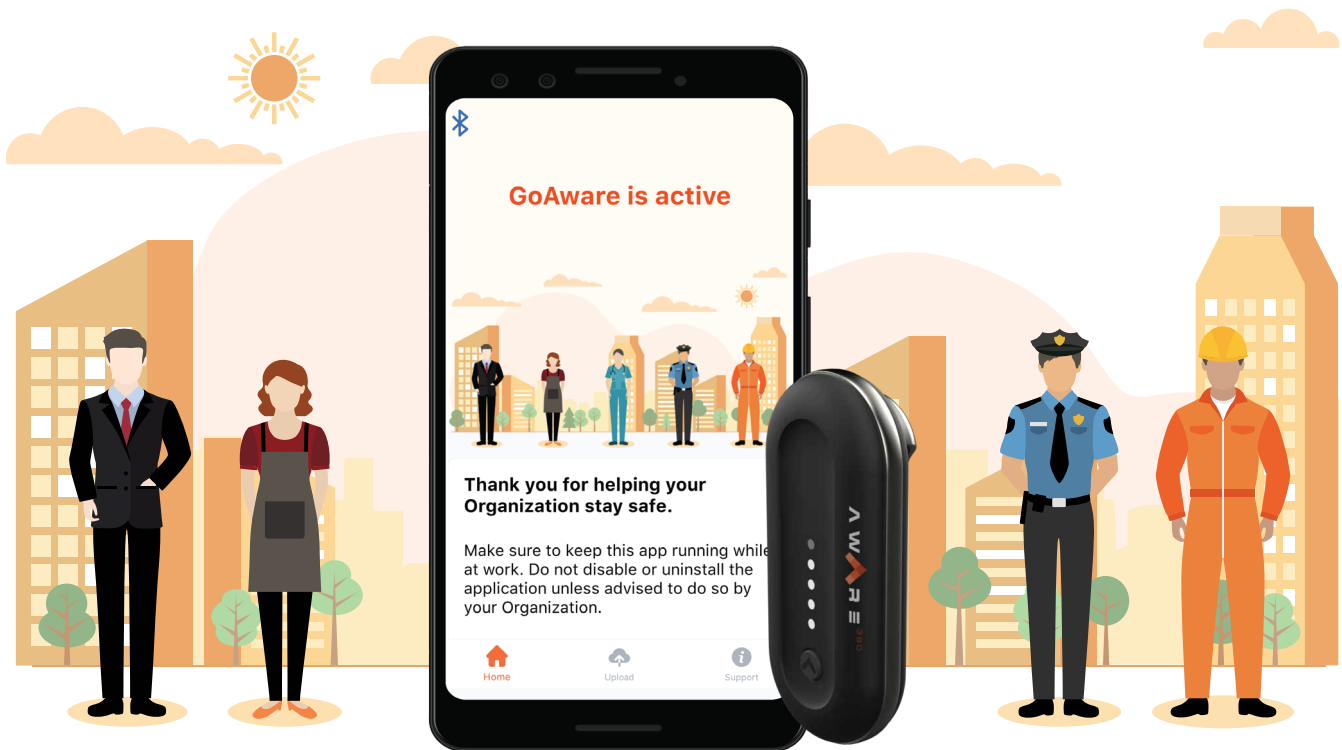

## Aware360: GoAware

Prevent spread and enhance contact tracing with app and wearable technology.

Workplaces are at a high risk for the spread of viruses like COVID-19, especially where workers are in close proximity. Business leaders have a responsibility to ensure a safe workplace for both the health of their workers and for their ongoing business continuity.

GoAware provides organizations the tools to manage a safe return to work. With an easy-to-use smartphone app and / or interoperable GoClip wearable, the solution helps workers maintain social distancing with real time reminders. Additionally, the GoAware web-based management platform assists an organization in contact tracing in case of a positive COVID-19 test.

# Aware360: GoAware

Prevent spread and enhance contact tracing with app and wearable technology.

## How GoAware Works

Workers download the GoAware App or are given a GoClip contact tracing device.

If an individual tests positive for COVID-19 they must contact their Program Administrator.

The Program Administrator communicates with the infected worker to facilitate the upload of trace data from the App or GoClip device.

The Program Administrator follows the organization's COVID-19 positive test policy using contact trace data to assist their efforts.

## Key Benefits

- ✓ Prevent the spread of viruses with real time social distancing reminders
- ✓ Keep workers safe with rapid access to contact tracing data
- ✓ Ensure business continuity by avoiding worksite shutdowns
- ✓ Prove your business is compliant with legislation
- ✓ Demonstrate prioritization of worker safety to unions

# Contact Tracing and Social Distancing Reminder Wearable

## Aware360: GoBand Wearable

Prevent spread and enhance contact tracing with wearable technology.

The GoBand wearable provides real-time social distancing reminders and captures tracing contacts from others wearing the device. If your organization requires an alternative to smartphones for contact tracing, the GoBand offers a cost-effective option offering the same features as the GoAware App. GoBands are assigned and data is uploaded quickly and easily, through the Administrator's app.

### Features

- Standalone, does not require a smartphone
- Real time social distancing reminders - haptic vibration + LED notification
- Real time contact trace record creation for business continuity
- Connectivity via Bluetooth Low Energy (BLE) 5.0
- One week battery life with rechargeable battery via USB
- Works with temperatures ranging from -20 C to +60 C
- Lightweight and comfortable to wear
- Up to 20,000 contact records stored securely on the device
- No data upload unless required for positive test tracing
- Data upload is only initiated by Organization's HR Admin via the app
- Waterproof grade IP67
